

Animal facts

By Luke and Sophia.

Spiders

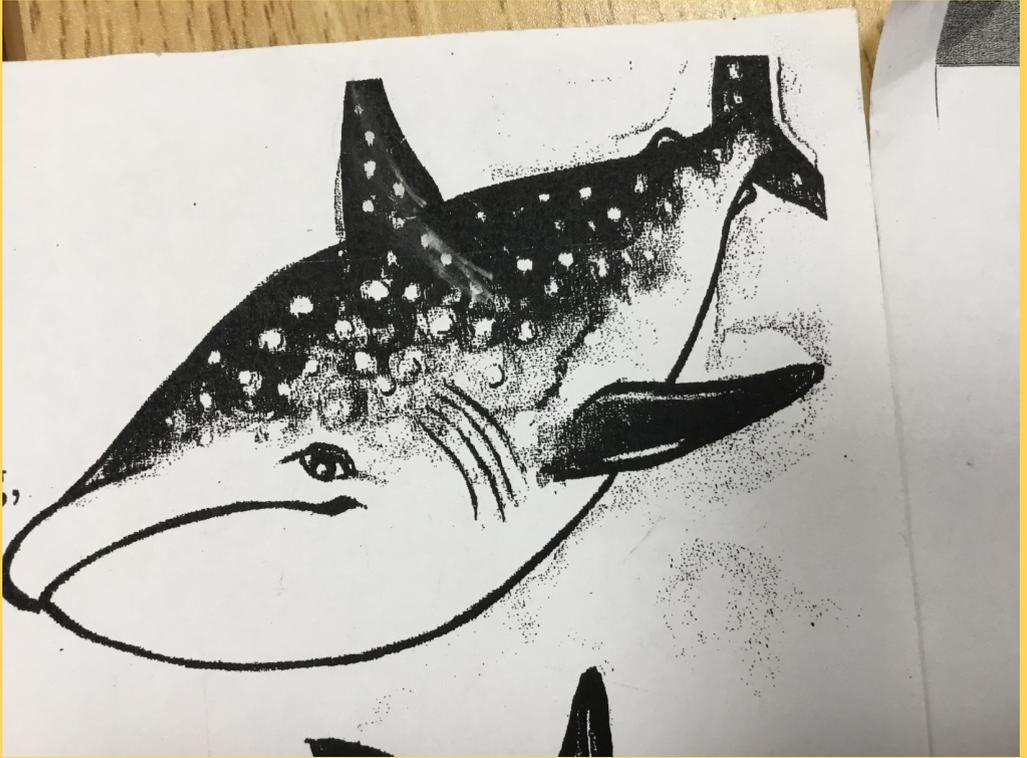

They can be found almost anywhere in the world

Many spiders catch their food in their webs

These webs are made from silk thread

Spiders have eight eyes but don't usually see well

Sharks

There are 370 kinds of sharks

Sharks never run out of teeth

Sharks can smell blood

Blue sharks, basking sharks and dogfish are some of the sharks that live in the sea around Ireland.

The giant panda

The giant panda lives in China.

The panda is now very rare.

It is protected in China because there are so few left.

The panda cub is tiny.

Dolphins

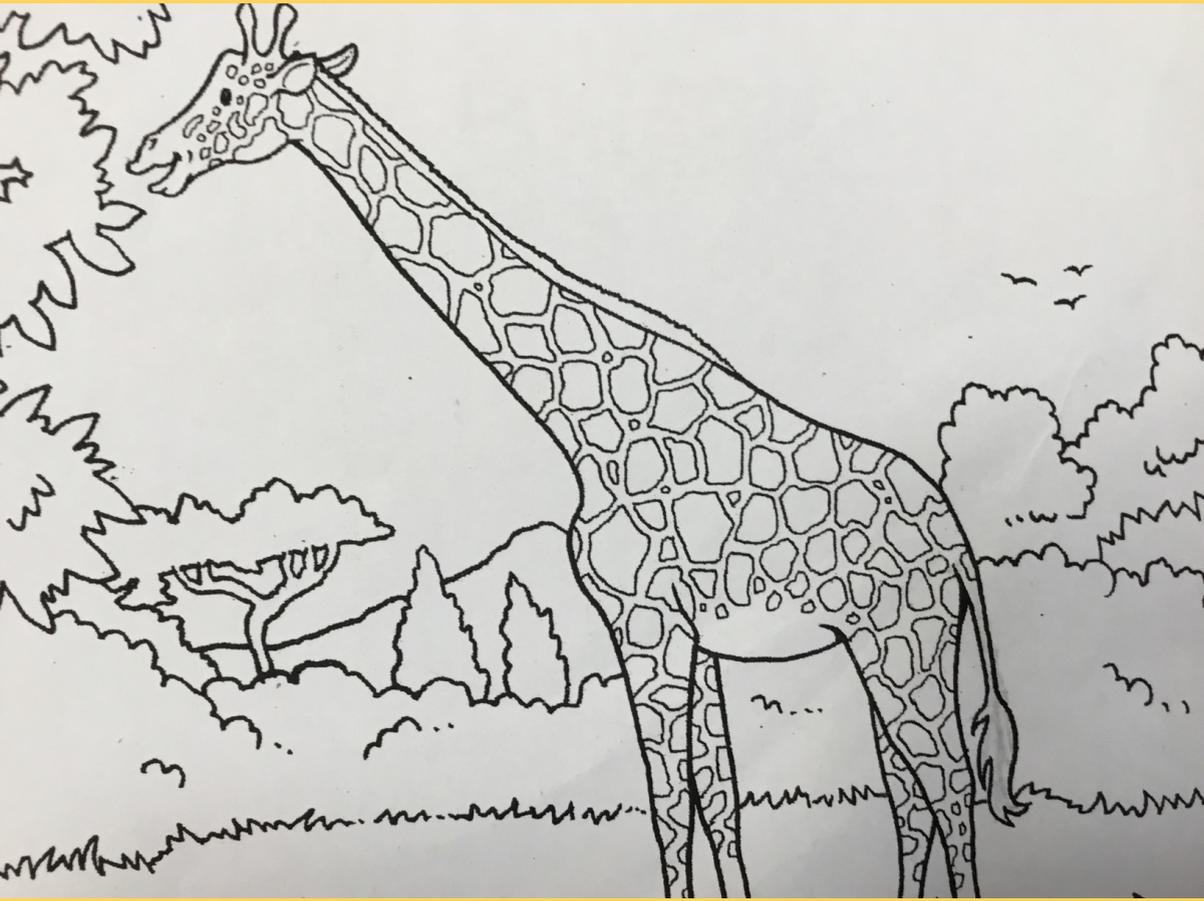

Dolphins have little or no sense of smell

Dolphins have excellent eyesight and hearing.

Dolphins are mammals that live in the oceans of the world.

Giraffe

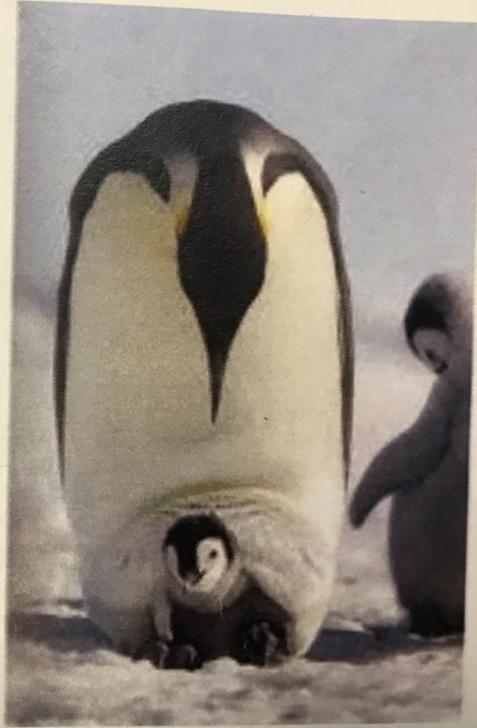

The giraffe lives in Africa.

It is the tallest of all animals.

Each coat has it's own pattern.

The lion is a giraffe's enemy.

Emperor penguin

They can stay under water for 18 minutes.

They take turns to be on the outside.

They huddle in big groups to stay warm. They cannot fly but

They are very good swimmers.
